

ATTENTION ALL LOUISIANA MEDICAID PROVIDERS

Webinar Announcement

Louisiana Medicaid Payment Error Rate Measurement Requirements

The Office of Management and Budget (OMB) has identified Medicaid and the Children's Health Insurance Program (CHIP) as programs at risk for significant improper payments. As a result, CMS developed the **Payment Error Rate Measurement** also known as the **PERM** program to comply with the IPIA, IPERA, IPERIA and related guidance issued by OMB.

The PERM program measures improper payments in Medicaid and CHIP programs and produces improper payment rates for each program. Random providers may be contacted to provide fee for service claim records for review. The Louisiana Department of Health will be hosting webinars to inform providers of their responsibilities to comply with requests for records requested by the PERM contractor, CNI Advantage. Links with dates and times for the webinars are below.
