

!!! ATTENTION ALL ADULT DAY HEALTH CARE PROVIDERS !!!
Change in Billing Form for ADHC Services

Louisiana Medicaid is converting the billing of Adult Day Health Care (ADHC) services from the UB-04/837I to the CMS-1500/837P.

- Adult Day Health Care Providers are to continue to use the UB-04 Claim Form for paper claims and the 837I for electronic claims through Date of Service March 31, 2016.
- Effective with Date of Service April 1, 2016 and afterward, Adult Day Health Care Providers must use the CMS 1500 Claim Form for paper claims and the 837P for electronic claims.

It is the provider's responsibility to ensure that internal office processes are in place and billing is submitted on the correct form/EDI format with correct claim information, depending on the Date(s) of Service.

Important Note: During the last week of March 2016, split billing must be used for claims that cover March dates of service and the April date of service.

- Providers must use the UB-04 Claim Form/837I for March 28th, March 29th, March 30th and March 31st; and
- Providers must use the CMS 1500 Claim Form/837P for April 1st services.

Louisiana Medicaid and Molina are developing instructions to use for the new claim form/electronic format, including any billing changes. They will be available to you soon.

- The billing instructions will be posted on the Louisiana Medicaid web site, www.lamedicaid.com, directory link – Billing Information.
- The revised EDI Companion Guide (837P) for ADHC providers will be posted on the web site directory link – HIPAA Information Center, sublink – 5010v of the Electronic Transactions, sublink – 837 Health Care Claim – Professional Companion Guide.

Please watch for this important information to ensure that you are ready for this transition.
