** These forms are found in this packet

Original signatures are required

Please submit all required documentation to:
Gainwell Provider Enrollment Unit
PO Box 80159
Baton Rouge, LA 70898-0159

C. Coverage Options.--Clinic services, as defined by 42 CFR 440.90, do not include services provided by hospitals to outpatients. Outpatient hospital services, which are authorized by the regulations at 42 CFR 440.20, are separate and distinct from clinic services. As defined by the regulations, clinic services must be provided by a facility that is not part of a hospital but is organized and operated to provide medical care to outpatients. Thus, clinic services, in accordance with 42 CFR 440.90, must be provided by a freestanding facility, which means that the clinic may not be part of a hospital. However, a clinic may be located in the same building as a hospital, as long as there is no administrative, organizational, financial or other connection between the clinic and the hospital.

Clinic services are optional; States may or may not elect to cover these services under their Medicaid programs. There are different types of freestanding clinics that are organized and operated to provide medical care to outpatients, and different types of clinic services that are available. If a State elects to cover clinic services, it may choose the type of clinics or clinic services that are covered, provided that the services constitute medical or remedial care. Thus, a State may provide coverage for some but not all kinds of clinic services.

D. Provision of Clinic Services to Residents of SNFs, ICFs, AND ICFs/MR.--Clinic services are defined in part, at 42 CFR 440.90, as services that are provided to outpatients. At 42 CFR 440.2, an outpatient is defined as a patient who is receiving professional services at an organized medical facility, or distinct part of such a facility, neither of which is providing the patient with room and board and professional services on a continuous 24-hour-a-day basis.

The definition of outpatient does not exclude residents of title XIX long term care facilities from receiving clinic services either through an arrangement between the facility and the clinic or from a clinic which is chosen by the resident. However, because of the regulatory requirement that clinic services may be provided to outpatients only, the clinic from which they receive services may not provide them with room and board and professional services on a continuous 24-hour-a-day basis. Furthermore, because of the outpatient requirement, eligibility for clinic services is limited to those patients:

1. who for the purpose of receiving necessary health care go or are brought to a clinic, or other site at which the clinic staff is available; and
2. who the same day leave the site at which the services are provided.

Thus, this requirement precludes residents of skilled nursing facilities, intermediate care facilities and intermediate care facilities for the mentally retarded from receiving clinic services that are provided in the long term care facility itself. Therefore, these services must be provided at a location which is not a part of the long-term care facility. While such services, if provided at the location of the facility, may not be covered as clinic services, they could be covered as long term care services if included in the package of institutional services provided to the residents of the facility.
