1.0 OVERVIEW

Support Coordination Service Providers (Case Managers) have access to the **Prior Authorization (PA) Requests for Case Managers** computer system on the Louisiana Medicaid Provider Support Center Web site at <http://www.lamedicaid.com>.

The purpose of this computer system is to provide Case Managers the capability to view PA requests for Medicaid recipients who are linked to their agencies that are submitted via the electronic Prior Authorization (ePA) computer system by the servicing provider.

1.1 Objectives

The principal functions of this Web application are:

1. Electronic PA request searches
2. User-selectable search criteria
3. Sort and page search results
4. View selected PA requests information
5. Restrict Case Managers view of PA requests to cases assigned **only** to their Provider ID
6. Allow authorized state of Louisiana Department of Health (LDH) personnel to inquire on all PA requests

1.2 Case Management Process Description

The Case Management process, illustrated below, begins with the user (LDH or Case Management Agency) accessing the case management application and selecting the desired search criteria. Depending on a user's access rights (LDH or Case Manager), the application will display either all PA requests (LDH) or only those PA requests that have the same Provider ID as the provider logged in (Case Manager Agency):
