

State of Louisiana
Department of Health and Hospitals
Bureau of Health Services Financing

MEMORANDUM

DATE: October 3, 2014
TO: All Louisiana Medicaid Providers
FROM: 
J. Ruth Kennedy, Medicaid Director
SUBJECT: Additional Diagnosis Codes on Antipsychotic Medications for La Medicaid Pharmacy Program

The purpose of this memo is to advise you that effective October 8, 2014, the Louisiana Medicaid Pharmacy Program will amend the list of covered diagnoses for antipsychotic medications to include additional behavioral health-related diagnoses. The Louisiana Medicaid Drug Utilization Review Board and other behavioral health stakeholders provided input regarding this diagnosis code expansion. The additional diagnoses are listed in the table included with this memo and are noted in bold text.

Diagnosis Code Requirement on All Antipsychotic Medications

For the medications listed in the table, an ICD-9-CM diagnosis code must be documented on the hardcopy prescription or in the pharmacy's electronic recordkeeping system.

Pharmacy claims for all antipsychotic medication prescriptions should deny at Point of Sale (POS) when there is a missing or invalid diagnosis code submitted in NCPDP field 424-DO (Diagnosis Code) with:

NCPDP rejection code 39 (Missing or Invalid ICD-9 diagnosis code) mapped to EOB code 575 (Missing or Invalid ICD-9 diagnosis code)

Prescribing providers may call Louisiana Medicaid RxPA Operations at the University of Louisiana at Monroe School of Pharmacy at 1-866-730-4357 for guidance when recipients are established on antipsychotic medications but the ICD-9-CM diagnosis codes submitted are not included in the table of covered diagnoses.

When the diagnosis code written on the prescription is not included in the list of covered diagnoses AND when the pharmacist cannot reach the prescriber OR when the RxPA Center is closed, the pharmacist, using his/her professional judgment, may deem the filling of the antipsychotic prescription to be an 'emergency.' In these emergency cases, the pharmacist must indicate 'Emergency Prescription' on the hardcopy prescription or in the pharmacy's electronic recordkeeping system AND may override the diagnosis code requirement by:

**Placing the 'alternative' ICD-9-CM diagnosis code in NCPDP field 424-DO
(Diagnosis Code) and by placing '03' in NCPDP 418-DI field (Level of Service)**

Compliance associated with program policy will be verified through the Louisiana Medicaid Pharmacy Compliance Audit Program.

Your continued cooperation and support of the Louisiana Medicaid Program efforts to coordinate care and improve health are greatly appreciated.

If you have questions about the contents of this memo, you may contact the Pharmacy Help Desk at (800) 437-9101, send a fax to (225) 342-1980, or refer to www.lamedicaid.com.
