

### **ATTENTION AMBULANCE PROVIDERS:**

During the period March 2014 through June 2014, some hardcopy Ambulance Medicare Part B Crossover claims were incorrectly paid by Medicaid in error. Corrective action was taken to prevent further payment issues and affected claims are now being adjusted to correct the payments. It is possible for a single provider to have adjustments appear on multiple RAs until all claims have been adjusted. Any overpayments will be recovered from current provider payments.

The adjustment Internal Control Number (ICN) will carry a weekend julian date. The first round of adjustments will appear on the RA of September 23, 2014 with ICNs beginning with 4229 and 4236.

These claims will appear in the adjustment section of the RA, and adjustments will be done weekly until all claim corrections are completed. In cases involving multi-line claims, the entire original claim is rekeyed/adjusted for provider convenience and auditing purposes. Some adjusted claim lines will show no difference between the original payment and the adjusted payment. We apologize for any inconvenience this has caused providers.
